

Gaugeable Chromatograph and Column End Fittings

Features

- Suitable for liquid or gas chromatography
- 316 stainless steel construction
- Offered in sizes from 1/16 to 1/2 in.

Pressure-Temperature Ratings

Swagelok chromatograph and column end fittings are rated to the working pressure of tubing as listed in Swagelok *Tubing Data*, MS-01-107. Careful selection of high-quality tubing is important when installing safe, leak-tight systems.

Cleaning

Fitting components are cleaned to remove machine oil, grease, and loose particles. For more information, see Swagelok *Standard Cleaning and Packaging (SC-10)*, MS-06-62.

The dead volume in the low-volume fitting is equal to the volume of the 0.052 in. bore. The tubing in the zero-volume fitting is inserted to the frit.

Both low- and zero-volume column end fittings are available with stainless steel sintered frits. Frits are loosely installed to facilitate removal and replacement. To order, add a frit designator to the ordering number.
